ALICE Response Plan

Traditional response to an active shooter incident has been to shelter in place and wait for law enforcement official to arrive. While this type of response is not completely wrong, case studies of several active shooter/killer incidents have shown that using only this response has resulted in an increase in casualties. The district has adopted the “ALICE” response plan to assist you in your response should this type of incident occur. Persons may or may not receive advance warning of an active shooter/killer. A witness, personal observation or the sound of gunshots may be the only alert you receive, leaving little time to react. If you hear the sound of gunshots, you should begin to take necessary precautions.

In the event of an active shooter emergency, the “ALICE” response plan to assist you in determining the best options available to survive an attack. The “ALICE” response does not follow a set of prescribed actions, and you may not need to utilize all of the five steps when confronting an active shooter. Your survival is the most important outcome.

“ALICE” is an acronym for 5 steps you can utilize in order to increase your chances of surviving a surprise attack by an Active Shooter. Again, it is important to remember that the “ALICE” response does not follow a set of actions you “shall, must, will” do when confronted with an Active Shooter.

Alert

- Any number of things can alert you to a shooter situation:
 - Gunfire.
 - Witnesses.
 - Unusual commotion on campus.
 - Phone/Text alerts.

Lockdown

- A lockdown is a semi-secure starting point from which to make your survival decisions. If you decide not to evacuate, secure the room.
 - Lock the door.
 - Cover any windows in the door if possible.
 - Tie down the door if possible using belts, purse straps, shoe laces, etc.
 - Barricade the door with anything available (desks, chairs, file cabinets.).
 - Look for alternative escape routes (windows, additional doors).
 - Call 911.
 - Move out of the doorway and windows in case gunfire comes through it.
 - Silence or place cellphones on vibrate.
 - Once secured, do not open the door for anyone. Unfamiliar voices may be the shooter attempting to lure you out. Police will enter the room when the situation is over.
 - Gather weapons (coffee cups, chairs, books, pens, etc.) and mentally prepare to defend yourself or others.
 - Put yourself in position to surprise the active shooter should they enter the room.
 -

Inform

- Use any means necessary to pass on real time information.
 - Use plain language.
 - Derived from 911 calls, video surveillance, etc.
 - Who, what, when where and how information.
 - Helps people in or around the areas area to make common sense decisions.
 - Can be given by Flash Alerts, PA Announcements, public safety radio speakers.

Counter

- Use of simple, proactive techniques should you be confronted by an active shooter.
 - Anything can be a weapon.
 - Throw things at the shooter's head to disrupt his aim.
 - Create as much noise as possible.
 - Attack in a group (swarm).
 - Grab the shooter's limbs and head. Take the shooter to the ground and hold him there.
 - Fight dirty: Bite, kick, gouge eyes, etc.
 - Run around the room and create chaos.
 - If you have control of the shooter call 911 and tell the police where you are and listen to their commands when officers arrive on the scene.
 - Do not touch the weapon. Secure weapon inside trash can if possible.

Evacuate

- Remove yourself from the danger zone as quickly as possible
 - Decide if you can safely evacuate.
 - Run in a zigzag pattern as fast as you can.
 - Do not stop running until you are far away from the scene.
 - Bring something to throw at the shooter should you encounter him.
 - Consider if a fall from a window will kill you.
 - Break out windows (top corner) and attempt to quickly clear glass from the frame.
 - Consider using belts, clothing or other items as an improvised rope to shorten the distance you would fall.
 - Hang by your hands from the window ledge to shorten your drop.
 - Attempt to drop into shrubs, mulch or grass to lessen the chance of injury.
 - Do not attempt to drive from the area.

What to Expect from Responding Police Officers

- Police are trained to proceed immediately to the area in which shots were last heard. Their purpose is to stop the shooting quickly.
- Responding officers will normally be in teams. They may be dressed in regular patrol uniforms, or they may be wearing external bulletproof vests, kevlar helmets, and other tactical equipment. The officers will be armed with guns. Regardless of how they appear, remain calm, do as the officers tell you, and do not be afraid of them.
- Responding Police will have their weapons drawn and ready for use. They do not know exactly who the shooter/killer is and will probably point weapons at you. Just remain calm and follow any directions they may give you. You may be asked questions, patted down, and given orders to exit certain ways.
- Put down anything you may be carrying and keep your hands visible at all times.
- Do not point anything at Law Enforcement.
- The first officers will not stop to aid injured people. Other officers and emergency medical personnel will follow to remove injured persons. Be prepared to have to provide first aid. Think outside the box. Tampons and feminine napkins can be used to stop blood loss. Shoes laces and belts can be used to secure tourniquets. Weighted shoes can be tied around a person's head to immobilize it. Remember it may be several hours until can safely move an injured person. The actions you take immediately to treat victims may save their life.
- Keep in mind that after you have escaped to a safer location, the entire area is still a crime scene.
- Police will usually not let anyone leave until the situation is fully under control and all witnesses have been identified and questioned.
- Until you are released, remain where authorities designate.
- Law Enforcement can take hours to clear a building. Stay calm and be patient.

Power Failure/Other Electrical Emergencies

Evacuation

Procedures for Instructional/Office Staff on Attendance Tracking

The primary causes for evacuation will be fire or earthquake. Each instructor/area coordinator must be prepared to react quickly and properly. Each instructor/area coordinator should have an accurate accounting of attendance/Census Reports.

PROCEDURES:

1. Remain calm and determine the nature and location of the disaster without leaving the immediate area.

Evacuation (page 2)

Emergency Assembly Areas:

- Northside Assembly Area: The evacuation point is the parking lot to the north of the cinema.
 - If the Westside Assembly Area: The evacuation point is through the double doors east of the mall into the parking lot.
2. **Staff:** Should remain with students until further direction is given. This direction may come in a variety of ways depending upon the nature of the event which caused the evacuation. Direction may be given by oral or written word from the Incident Commander or Designee.
 3. In all cases, be certain that: injured and disabled are evacuated and cared for; all students and staff are accounted for; and the alarm has been sounded if you or someone in your class was the first to discover the potential disaster.
 4. Completed "Census Report" must be turned in as soon as possible to the Vice President, Student Services and Vice President, Administrative Services.
