\*Speak with an Admissions Counselor if you do not meet this requirement.

Palmer College of Chiropractic is an Equal Opportunity Employer and Educator

**We've got it down to a science.** In just over three calendar years, you can earn a Doctor of Chiropractic degree.

Palmer's academic framework blends core curriculum, hands-on clinical skills and an array of technique courses to draw you toward one distinct goal: **your success**. With help from academic advisers, you'll fulfill each element of the Palmer curriculum, all while finding your niche in elective technique classes.

**CORE CLASSES**

Our curriculum includes basic sciences, clinical sciences, chiropractic technique, chiropractic philosophy, and business management to provide you a broad knowledge base in the health-science discipline as well as basic business acumen.

**CLINIC EXPERIENCE**

In your last year at Palmer, you'll undergo extensive clinical training in our outpatient clinics (equipped with the latest technology!) under close supervision of a faculty clinician. Our unique mentorship model is supportive – focusing on collaborative, evidence-based, patient-centered care with input from the patient as a member of the health-care team.

**THE PALMER PACKAGE**

This is a group of chiropractic techniques that provide you with the expertise needed to deal with virtually any clinical situation that may emerge in practice. In addition to the required core-curriculum technique courses, you'll also have extensive coursework in chiropractic philosophy and business management.

**YOUR SUCCESS**

No matter which Palmer campus you choose, you'll receive unmatched experiential classroom learning and real-world clinical training. You may also choose to expand your training beyond the classroom through research projects, technique clubs or leadership opportunities.

*How you use this powerful curriculum and make it your own will determine your success.*
